DIFFERENCE IN PACK SIZE

All of the 2's, 3's, 4's and 5's are removed from the standard 52-card pack leaving a game where only 36 cards are used. This means the 6 is the lowest card.... Unless you use an Ace as low.

AN ACE HAS ADDED VALUE

As in traditional Hold'em the Ace can be used as either a High or Low, but in the Short Deck version of the game it can also make up the low and high ends of a straight. As in:

- A 6 7 8 9 is classed as a straight (In this example the Ace is classed as a '5')

HAND RANKING DIFFERENCES

While there are only a few differences in the value of a hand between the 2 formats of Hold'em these are very significant and will prove expensive if forgotten.

In Short Deck Hold'em...

- A Flush beats a Full House – This is because mathematically it is harder to make a flush than a full house from the reduced deck.
